EDUCATION

2017-2021
JERUSALEM COLLEGE OF ENGINEERING
BE Civil Engineering

SKILLS

FRONT-END:
React, JavaScript, HTML5, CSS3, Material-UI

BACK-END:
Java Spring Boot, RESTful APIs, Node js , Express

DATABASE:
MySQL , MongoDB , Google sheete

DEVOPS:
Docker, Jenkins, CI/CD

TOOLS:
Git, GitHub, VS Code, Postman

LANGUAGES

- English
- Tamil

PARI ARUL

FULL STACK DEVELOPER

PROFILE

Enthusiastic and detail-oriented Full Stack Developer with a strong foundation in front-end and back-end technologies. Proficient in building responsive web applications using modern frameworks like React.js and backend technologies such as Node.js, Express.js, Java, and Spring Boot. Skilled in working with databases like MySQL and MongoDB. Passionate about clean code, scalable architecture, and continuous learning. Adept at collaborating in team environments, solving real-world problems, and delivering high-quality solutions. Seeking an opportunity to contribute technical skills, creativity, and a growth mindset to a dynamic development team.

WORK

- Developed and maintained scalable web applications using React.js and Spring Boot, improving system performance and user engagement.
- Designed responsive UI layouts with Material-UI and Tailwind CSS, ensuring mobile-first and cross-browser compatibility.
- Built RESTful APIs to manage dynamic data and integrated frontend with backend services seamlessly.
- Implemented form validation and error handling using libraries like React Hook .
- Integrated third-party libraries like Axios for API communication and Framer Motion for smooth UI animations.
- Worked with context APIs and Redux Toolkit for efficient state management in medium-to-large applications.
- Designed and developed RESTful APIs using Node.js with Express.js and Java with Spring Boot.
- Integrated authentication and authorization using JWT (JSON Web Tokens) and Spring Security.

FREELANCE PROJECT

MilkyWay - **Milk Product E-commerce Platform**
REACT.JS, JAVA SPRING BOOT, MYSQL, REDUX TOOLKIT, JWT AUTHENTICATION
Description:
Developed a full-stack e-commerce app for dairy product sales. Built a secure backend with Spring Boot and MySQL, handling product listings, user registration/login (JWT-based), and order management. Created a dynamic user dashboard for tracking orders and managing the shopping cart. Frontend built with React.js and Redux Toolkit for state management, and designed a mobile-first UI using material UI.

Cobeno - **Business Development Company**
REACT.JS, NODE.JS, EXPRESS.JS, GOOGLE SHEETS , MATERIAL-UI
Description:
Built a professional website for Cobeno, a business development and consulting company. Instead of a traditional database, integrated Google Sheets API as a backend database to manage dynamic content such as service listings, testimonials, and client data. Designed an admin-friendly flow allowing non-technical users to update content directly through Google Sheets. Focused on a clean, corporate look using Material-UI components and deployed the website using godaddy.

HealthCare   REACT.JS, NODE.JS, EXPRESS.JS, MONGODB, REDUX, JWT AUTHENTICATION, OAUTH , REDUX
Description:
Developed the frontend of HealthCare, a platform for managing patient data and appointments. Used React.js and Redux for dynamic UI and state management. Implemented JWT Authentication and OAuth for secure logins. Designed a responsive dashboard using Material-UI for components and Tailwind CSS for custom styling. Integrated backend with Axios for API communication
